

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Why should you use multiple energy storage containers?

Multiple containers can be combined to create larger energy storage capacities, providing scalability based on the application energy requirements. This solution is ideal for retrofit installations, when dedicated battery room space is unavailable, and for semi-permanent installations.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

Air cooling or liquid cooling system available. Containerized ESS solutions can be connected in parallel to increase the total energy capacity available to hundreds of MWh. NEXTG POWER offers a range of battery solutions from high power ...
