How many panels & how much roof space for a 10kW solar system? Most residential solar panels have a output rating of 330W to 400W meaning a 10kW system will need 25-30 solar panels (typically 1.7 metres by 1 metres in size) and will require about 80 m<sup>2</sup> of roof space. More efficient solar panels will reduce the roof space required and typically cost more as they are utilising ...

On average, a 10 kW solar panel system costs \$27,500, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 10 kW solar panel system in your state.
