

This dish is designed to keep food warm, with a metal enclosure base and an opening into which you pour hot water to keep the food warm. Two moveable handles make carrying safe and convenient. ...

Headquartered in St. Louis, Mo., IWR North America is one of the longest-standing specialty contractors in the nation, providing turnkey building enclosure and custom specialty metal design services coast ...

Metal kitchen cabinets were seen as cutting-edge in the 1940s, offering durability and a modern aesthetic. Made from steel or aluminum, these cabinets were easy to clean and resistant to ...

It was a metal mesh enclosure that parents attached to the outside of the window so the baby could sit or lie in it while still being contained. The idea was to give infants sunlight and ventilation, which doctors at the time believed ...

1950"s Industrial Metal Storage Cabinet - Cupboard. Good honest heavy duty cabinet sourced from a foundry in Lancashire. The cabinet has been sandblasted and sealed. Three fixed shelves. The ...

A reproduction of a 1940s cooling rack for industrial molds, our table has a lean, low-slung silhouette that recalls its factory origins. Sculpted iron X-form legs and a sheet-metal top reprise the well-worn ...
