What is a powerease 300w power supply?

The PowerEase® 300W Power Supply is a microprocessor-controlled power supply designed to meet most electrophoresis needs in a single easy to use unit. The power supply's small foot print and stacking feature conserve valuable bench space. This instrument is ideal for DNA/RNA electrophoresis, SDS-PAGE, and native PAGE.

How much power does a 300w power supply use?

Add all your stuff up, power supplies spike on startup for a few seconds and give their max rated power only for that short time, sometimes even a little more. Normally, a 300W runs at about 200W-230W once the machine is up and running. Ran across this interesting article regarding a dual ATX Power Supply setup...
