

How accurate is the watchuseek 8120 (Shanghai B) movement?

The 8120 (Shanghai B) movement is a 17 jewel hand winding unit. Information is not abundant, but the fine fellows on the Watchuseek Chinese Mechanical Watch Forum say it is accurate and reliable. My own timing runs indicate a loss of about 25 seconds in 24 hours, which is about what I would expect and more than sufficient for daily use.

Is the watchuseek 8120 a good watch?

Cracked leather goes well with this watch, and NATOs are a good fit with those long lugs. The 8120 (Shanghai B) movement is a 17 jewel hand winding unit. Information is not abundant, but the fine fellows on the Watchuseek Chinese Mechanical Watch Forum say it is accurate and reliable.

Is the HMT 8120 a bad strap?

It is not a bad strap and far nicer than what you might get from HMT, but the Shanghai cries out for a strap swap. Cracked leather goes well with this watch, and NATOs are a good fit with those long lugs. The 8120 (Shanghai B) movement is a 17 jewel hand winding unit.

Is the Eterna 8120 a reissue?

The 8120 is labeled as a reissue, but I have yet to find the Shanghai original. Regardless, it is clearly an homage to Eterna's 1958 classic. It borrows the triangular frames, arrow-shaped hour markers, dauphine hands, even the wood grain texture in the center of the dial. Of course, it does not try to pass itself off as the genuine article.

What is a la Joux-Perret 8120?

The La Joux-Perret 8120 is based on the 7750. It is modified to have subdials at 3, 6 and 9 and does away with the day window found in its base movement.

Can the 8120 & 9120 float through the field?

Optional rugged power guide steering axle is available for when the going gets tough in wet or soft field conditions. To keep harvest on pace in the most demanding drive conditions, the 8120 and 9120 can float through the field on factory optional 36" tracks, the same as those on Quad-Track tractors (see figure 4.2).

Power Reserve: Fully-wound and worn (in my experience) roughly a day+. According to the manual, the SB1-H is a non-hackable movement with 3 positions due to a date window that is not present on this model and it ...

The vintage style Shanghai/Diamond manual watches with a 8120/7120/17ZUAN movement. Definitely not the most reliable or accurate but for \$30 it keeps time. I really think is a neat ...

It's possible that the movement is a SB1H, a thinner version of the Chinese Standard Movement.

[https://chinesewatchwiki/Chinese\\_Standard\\_Movement](https://chinesewatchwiki/Chinese_Standard_Movement). The listed case diameter of these ...
