

What is the frequency of Miyota 9015 movement?

The Miyota 9015 movement has a frequency of 28,000 vibrations per hour and functions precisely. It specifies the deviation to be in the range of -10 to +30 seconds per day. with a power reserve of 42 hours, a watch with this automatic movement can be placed aside for two days without stopping.

Is Miyota 9015 a good movement?

Garbage Seiko movements in low end watches and Miyota's own 8215 series brought that on. Some of us are used to quality Swiss movements in our mechanical watches and fear blowing even a few hundred on something "less". SO FAR, the Miyota 9015 is the only movement which has proved me wrong. MANY DO. Including me until I bought one.

Is a 9015 a top drawer movement?

@fluffyfreak505 on the IG, trucks, watches, and other random things! The 9015 is undoubtedly a top drawer movement. I actually prefer it to ETA; the accuracy is at least as good, and I prefer how the 9015 feels to wind, and find the difference between the winding, date change and time change crown positions on the 9015 more clearly defined.

Is the 9015 a good watch?

But as many others have stated, the 9015 is an accurate movement. My Sellita is a tad noisy while winding it up with the crown compared to my Miyota that is as quiet as a mouse when winding with the crown. I can't compare it to an ETA yet as my first ETA based watch will arrive in December. It's not so much the movement, it's the regulation.

What is a Miyota 9015 watch?

It is equipped with the automatic Miyota 9015 movement and has a sapphire crystal. It has a screw-down crown and a 44mm diameter dial. The scratch-resistant, AR coated crystal ensures durability, style and reliability and suits water sports enthusiasts. The heart of any watch is the movement it utilizes.

Which is better nh35 or 9015?

Here's how they compare: Accuracy: The 9015 is more precise with an accuracy of -10 to +30 seconds per day, compared to the NH35's -20 to +40 seconds per day. Frequency: The 9015 operates at a higher frequency of 28,800 vph, resulting in a smoother sweep of the seconds hand than the NH35's 21,600 vph. Jewels: Both movements feature 24 jewels.

It has a Miyota 9015 movement. I'm getting concerned that it has a power reserve issue. I know that this movement only turns one way to wind so I thought that was part of the problem, but I ...
