

Will Mauritania become a world-class liquefied natural gas hub?

expected to commence production in 2023. Mauritania is set to become a world-class liquefied natural gas (LNG) hub and intends to increase domestic consumption of gas to achieve its net zero emissions goal. It has strong potential to develop solar, wind and hydraulic energy, and is also a leading producer of critical minerals such as zinc, t

Can Mauritania harness wave energy?

Mauritania's 754 km coastline on the Atlantic Ocean provides a unique opportunity for harnessing wave energy. The average wave power along the coast is 17.5 kW/m, making it an ideal location for wave energy technology.

Should Mauritania invest in wind energy?

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to reduce reliance on fossil fuels and combat climate change.

Is Mauritania poised to become a major supplier of natural gas?

Mauritania is poised to become a significant global producer of natural gas and a leading player in Africa. With estimated gas reserves of 1400 billion cubic meters, the country has the potential to become a major supplier in the global market.

Is Mauritania a sustainable country?

Mauritania is making great strides in the realm of renewable energy. Their commitment to a sustainable future is evident in their increasing use of natural resources to generate electricity. In 2008, a mere 1% of electricity came from renewable sources, but by 2020, that number had grown to an impressive 37%.

Why should you invest in Mauritania?

Investing in Mauritania can offer a wide range of opportunities, particularly in the energy sector. With major gas discoveries and large-scale renewable energy projects in development, the country is poised for significant growth in this area.

Signé le 09 février 2018, l'Accord de Coopération Inter-États entre la République du Sénégal et la République Islamique de Mauritanie établit un cadre juridique essentiel pour le développement et l'exploitation des réservoirs du Champ Grand Tortue/Ahmeyim. Cet accord vise à harmoniser les législations
