By next summer,Basra,Amara,Dywania,Kut,Hilla,Nassriyaand other areas in Iraq,will house new electricity transmission substations that will bring reliable power to millions of people and help industries grow. Vice President,Grid Stabilization,Siemens Energy Middle East.

How can Iraq address its current electricity shortfall & growing power needs?

BAGHDAD - Iraq,one of the world's biggest energy producers,can address its current electricity shortfall and growing power needs through immediate action to relieve pressure on the system,according to an in-depth report published Thursday by the International Energy Agency.

How has Iraq's energy system changed over the years?

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages in Iraq during peak seasonal demand. As oil production has soared, so has the amount of associated gas produced alongside.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues,domestic reform is necessary. This past July,Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project,a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Does Iraq have a reliable electricity grid?

Now, two decades after the 2003 US invasion, Iraq has failed to see improvements in the electricity infrastructure. Although the disparity between supply and demand is widening due to population increase and rising temperatures, corruption remains the largest obstacle to a reliable electricity grid.

Will Iraq be able to connect to the GCC electricity grid?

Another planned power initiative aims to connect Iraq to the GCC electrical grid. This endeavor envisions delivering 1.8 gigawatts of electricity by 2025,stretching from the al-Wafra station in Kuwait to Iraq's Al-Faw station in the south.
