

How many power systems are there in Afghanistan?

The Afghanistan power system is categorized into four different networks namely, North East Power System, South East Power System, Herat Zone System and Turkmenistan system which facilitates both internal and cross border interconnections with neighboring countries like Uzbekistan, Tajikistan, Iran and Turkmenistan.

Who controls the power sector in Afghanistan?

Currently, the power sector is governed by Ministry of Energy and Water (MEW) and operated by Da Afghanistan Breshna Sherkat (DABS), which controls & operates all the activities of power sector throughout the country.

Does Afghanistan have electricity regulators?

In Afghanistan, the institution of electricity regulators has been introduced under USAID/GIZ assistance. Thereafter, this became an important item in the reform agenda for the Power sector and was ultimately included in the Afghanistan Electricity Law, 2015. INDC

Who supports Afghanistan's energy sector?

In addition to domestic agencies, there are numerous foreign funders and development partners that work with the government of Afghanistan. The US government, particularly USAID and the Army Corps of Engineers (ACE), have had a significant role in the country's energy sector.

What is the institutional analysis and development framework for Afghanistan's electric power sector?

To analyze Afghanistan's electric power sector, this study employs Elinor Ostrom's Institutional Analysis and Development (IAD) framework. The IAD framework is considered to offer an excellent fit with which to examine this problem, which focuses on the institutional arrangements and interactions that affect the electricity sector.

How to reform the electricity sector in Afghanistan?

Clarifying scope of work and forming a neutral regulatory body are key to reform. The electric power sector in Afghanistan suffers from numerous challenges. Roughly 70% of the population has no access to electricity, and 90% of those without electricity live in rural areas.
