

Thermo-economic optimization of an ice thermal energy storage system for air-conditioning applications: 2013 [68] Cooling: Simulation: Air: R134a / 3-5 °C; Ice, 1513 kWh: ...

The merits of the presented system can be summarized as follows: (1) a solar heat storage system using solar salt as the heat storage medium is incorporated to heat the ...

The compressed air energy storage system includes an air compressor unit, an energy release turbine unit, a cold water heat storage tank, a hot water heat storage tank, a ...

An integrated LAES system that uses waste heat from the compression train as a heat source and liquid air as a sink was proposed by Hamdy et al. . The integrated LAES system has an overall efficiency of 28.7% ...
