We have been using fossil fuels such as gas, oil, and coal to generate power from time immemorial. These non-renewable resources still have a very high demand in comparison to other renewable resources like Solar, air, and wind. Even though these sources of energy have plenty of cons, they still top the list and play [...]

The shift from a diesel pump to the solar-powered pump saves her an approximate 10,000 KES per month. These realized savings has enabled her to diversify into fish farming and to plant additional coffee bushes. "I was visiting ...
