

What is Anguilla's energy mix?

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

Does Anguilla have energy consumption by sector?

Energy consumption by sector is unknown. The draft CCP facilitates the transition of Anguilla to an energy independent, climate resilient, energy-efficient, low-carbon economy.

Where is Anguilla located?

Anguilla, a British Overseas Territory in the Eastern Caribbean, comprises a small main island and several offshore islets. The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030.

Does Anguilla use oil?

Like many island nations, Anguilla is almost entirely dependent on imported fossil fuels (more than 99% of the island's electricity is generated using heavy fuel oil), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

How much does Anguilla spend on electricity?

According to Mr Hodge, ANGLEC is currently spending between \$40-\$93 million a year in diesel cost to supply electricity to the island. "Two years at that level of expenditure, we can put in a wind and solar plant that have a life of at least 25 years," Mr Hodge stated.
