

Does Turkey need energy storage?

One of Inovat's four BESS projects built for distribution companies in Turkey. Image: Inovat. With a commitment to add 1GW each of new solar PV and wind each year, Turkey's need for energy storage is coming sooner rather than later.

Where is Inovat's battery storage located?

Inovat's battery storage is located at the company's factory in Ankara, the Turkish capital. The approach taken by Turkey's government and regulatory authorities to adapt energy market rules will create 'exciting' opportunities for energy storage and renewables. Image: Inovat.

What are energy storage systems?

Energy Storage Systems provide an increase in efficiency by shifting the load to renewable energy at the moment of consumption while lowering additional investment demand on the infrastructure. The mining industry trending towards the electrification of machinery and equipment to reduce greenhouse gas emissions.

Which energy storage asset will be built using Wärtsilä's new energy storage system?

The first energy storage project to use Wärtsilä's new 300MW/600MWh Quantum High Energy battery energy storage system (BESS) solution will be located in Scotland, UK.

Why is energy storage important?

Among these targets, energy storage has an important role. Energy storage increases access to clean energy, supports efforts to combat climate change, contributes to the development of sustainable infrastructure, and supports the creation of sustainable cities, thus promoting sustainable development goals.

Why are energy storage solutions important?

Energy Storage Solutions are of great importance for the industry in terms of both the integration of renewable energy and its carbon neutral targets. Energy use obtained from conventional power plants to charge electric vehicles outweigh the benefits by polluting the environment.
