

Who is Anthro energy?

The Anthro Energy team in the lab (from left to right): Christina Luu '16, Matt Klonkowski, Shane Sheraman, David Mackanic Ph.D. '20, Joe Papp (Photo Courtesy of David Mackanic) David Mackanic Ph.D. '20 founded Anthro Energy, a startup attempting to change the way batteries are made, after a breakthrough in his research on lithium-ion conductors.

What makes Anthro a great battery company?

of performance, safety, and mechanical integrity. Anthro's technology enables unprecedented battery form factors and novel battery chemistries to accelerate the electrification of everything. we operate at the intersection of materials science, climate-tech, product design, and the future of electronics.

How can thro solve the trade-off between energy density and safety?

At Anthro, we're developing the only scalable solution to solve the trade-off between energy density and safety in lithium-ion batteries. of performance, safety, and mechanical integrity. Anthro's technology enables unprecedented battery form factors and novel battery chemistries to accelerate the electrification of everything.

What is Anthro technology?

Using wearables as their entry market, Anthro is working today with customers to design novel and longer-lasting military and medical wearables, such as smart headbands and skin patches. Beyond wearables, Anthro technology unlocks many design possibilities. It enables batteries to be used in previously unsafe or space-limited applications.

Enter Anthro Energy, a pioneering advanced battery company that's set to reshape the future of energy storage. While traditional lithium-ion batteries are bulky, rigid, and potentially hazardous, Anthro Energy has ...

SAN JOSE, Calif., Oct. 23, 2024 /PRNewswire-PRWeb/ -- In an important step to strengthen the U.S. supply chain for advanced battery technologies, the U.S. Department of Energy's (DOE) ...

David Mackanic Ph.D. '20 founded Anthro Energy, a startup attempting to change the way batteries are made, after a breakthrough in his research on lithium-ion conductors. ...

Anthro Energy unlocks never before seen applications of electronics with an entirely new category of lithium-ion battery that decouples its form from its function. Anthro's novel polymer electrolyte renders batteries flexible (like ...

David Mackanic Ph.D. '20 founded Anthro Energy, a startup attempting to change the way batteries are made,

after a breakthrough in his research on lithium-ion conductors. Mackanic plans to use...

Anthro Energy just secured a \$24.9 million grant from the US Department of Energy to help bolster the domestic battery supply chain - a move that will have a big impact ...

Anthro's technology breaks this tradeoff to enable a new performance paradigm for batteries. Unlock the Full Potential of Lithium ... AdhesION(TM) stabilizes new battery chemistries that provide unprecedented amounts of energy. 2 x. ...

Anthro is a Private company. What is Anthro's current revenue? The current revenue for Anthro is . How much funding has Anthro raised over time? Anthro has raised \$27.7M. Who are ...
