Capacities for Solar Evacuated Tube Collectors - Apricus's solar hot water systems come with the option of 22, 30 or 44 tube configurations. Whichever setup is best suited for each individual installation is largely dependent on tank ...

A single ETC-30 tube collector is ideal for residential households of 4-5 people, able to provide 60-80% of domestic hot water demand (depending on location).. For commercial projects that demand a lot more hot water such as such as ...

Step 1: The Apricus evacuated tube solar collector converts sunlight into heat. A circulation pump moves liquid through the collector, carrying heat back to the solar storage tank. Step 2: Gradually throughout the day the water in the solar ...
