

Who is Aquion Energy?

Aquion Energy was a Bethlehem, Pennsylvania and Washington, D.C. -based company that manufactured sodium ion batteries (salt water batteries) and electricity storage systems.

How can I contact Aquion Energy?

To contact Aquion Energy, reach out to us directly through email, facebook, and other social media. If you have any questions that you can't answer on the site, we'd be more than happy to help in any way we can. Contact Aquion Energy. Find information on energy careers, press, or tech support.

What happened to Aquion Energy?

In March 2017, Aquion Energy filed for voluntary bankruptcy under Chapter 11. In June 2017, bidding starting with a stalking horse offer of \$2.8 million from an Austrian battery firm, BlueSky Energy.

When did Aquion Energy become a chemistry?

Aquion Energy was spun out from CMU in late 2009 after the first-generation version of the AHI chemistry was developed in the labs at CMU in 2008 by Dr. Whitacre, who graduated from Oberlin College in 1994 with a BA in Physics.

When did Aquion Energy start production?

Under the leadership of CEO Scott Pearson, Aquion began low volume production in the summer of 2011 and broke ground on a full-scale manufacturing facility in nearby Westmoreland, PA in 2012.

Why did Aquion get sued?

The company was sued in April 2017 for violation of the WARN Act. In August 2017, MIT Technology Review reported that the China Titans acquisition would mean that Aquion "will continue operating as an independent entity, with research and development probably remaining in Pittsburgh.

Aquion Energy is fundamentally changing the economics of power generation, transmission and distribution by developing and commercializing cost-effective energy storage solutions that are safe, reliable, and sustainable from nontoxic components as simple as saltwater.

Aquion Energy is the manufacturer of proprietary Aqueous Hybrid Ion (AHI(TM)) batteries and battery systems for long duration stationary energy storage applications. AHI batteries are ...
