

Will a new Lithium Project churn out in Argentina?

Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News. That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world.

Is Arcadium lithium still produced in Argentina?

Arcadium Lithium, the firm that resulted from the merger between Livent and Allkem, two of the three companies that were already producing lithium in Argentina, accounts for 13% of global production. Output has quadrupled in the last ten years, but is still attributable to only a few countries and projects. Another Argentine Unicorn on the Horizon?

How many new lithium mines are there in Argentina?

For all the money that's poured into Argentina's giant lithium deposits, the country has seen just one new mine come on stream in almost a decade. That's about to change. Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News.

How many companies are involved in a lithium project in Argentina?

These are some of the findings from a report prepared by the consulting firm Aleph Energy, led by Daniel Dreizzen, which analyzes the global lithium market while delving into Argentina in greater detail. These are the 41 companies of various characteristics that participate in the country's 64 projects.

Which Argentine sites produce lithium hydroxide and lithium carbonate?

Two Argentine sites, Salar de Hombre de Muerto and Salar Cauchari - Olaroz, are already producing lithium hydroxide and lithium carbonate, and are among the top three with the highest lithium concentration in the region, behind Salar de Atacama in Chile. They are also among the top three with the lowest impurities.

Does Argentina export lithium?

Read more... Despite a flurry of prospecting and development, only three operations in Argentina currently export lithium. That's still enough to have established the country as a major producer behind Australia, neighbouring Chile and China. Of the three, only one is a newcomer -- Minera Exar, which is majority owned by Ganfeng Lithium Group Co.

Among the 41 companies -- in some cases, more than one company owns the same project -- currently operating lithium projects in the country, Dreizzen has noted that some are not only involved in mining, but ...

Iron-air batteries work on the principle of reversible rusting. When the battery is discharging energy, the system takes in oxygen from the air and converts the iron metal into iron oxide, otherwise known as rust.

While the ...
