

When will Brockwell solar & storage be completed?

Subject to securing development consent orders (DCOs) in the summer of 2026, construction works on the project are expected to start in 2027 and take 30 months to complete. Brockwell Solar and Storage is a unit of Brockwell Energy established following the acquisition of RNA Energy in March 2024.

What is Brockwell solar and storage?

Brockwell Solar and Storage is a unit of Brockwell Energy established following the acquisition of RNA Energy in March 2024. Choose your newsletter by Renewables Now. Join for free!

Will a solar farm destroy a Roman town near Great Staughton?

Documents confirm that plans have changed to avoid the remains of a Roman town near Great Staughton. The deadline for responses to the survey is 29 October. Opponents fear a solar farm would result in the loss of high-quality farmland and spoil the view.

Brockwell's focus is on a range of renewable technologies, including Energy-from-Waste (EfW) and onshore wind. We are also keen to explore the investment opportunities around other exciting projects such as solar photovoltaics (PV), battery storage and hydrogen, and other flexible generation assets to support the government's drive towards ...

Brockwell Storage & Solar has submitted plans for a 5MW solar project at Sugghen Hall Farm, near Diss, Suffolk. The site is adjacent to an existing substation providing an ideal connection point to power people's homes with clean, renewable, and cheap electricity. The solar farm will include substantial hedgerow, tree planting, and wilder ...

RNA believes that the current energy crisis coupled by a significant imbalance burden that is today left with renewable energy generators offers a very compelling opportunity for flexibility assets such as storage on the medium to long term while the country still needs to significantly grow its renewable generation capacity to meet the EU Net-Zero targets.

With the backing of institutional capital, Brockwell Storage & Solar is on a mission to develop and build a portfolio of solar and storage projects to power the UK with cheap, clean, and reliable energy. Located in some of the sunniest areas of the UK, our 1.5GW pipeline of solar projects will begin construction in 2024.

Origination and development of BESS and solar projects across the UK. Site finding; Land agreements; Planning and consenting; Initial financial viability, modelling and analysis; Initial grid connection applications and security; Local community & stakeholder support.
