

Does Armenia have solar energy?

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh),and one-quarter of the country's territory is endowed with solar energy resources of 1 850 kWh/m² per year. Solar thermal energy is therefore developing rapidly in Armenia.

How important is R&D in energy technology and innovation in Armenia?

Research and development (R&D) in energy technology and innovation in Armenia is not significant,though it is becoming more important. The government's plan to develop new renewable energy technologies will increase the need for technology and innovation funding,and for skilled human resources.

What percentage of Armenia's Energy is renewable?

Renewable energy resources,including hydro,represented 7.1%of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small,private HPPs (under 30 MW),mostly constructed since 2007.

Who is responsible for energy sector governance in Armenia?

The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure(MTAI),which is responsible for overall energy policymaking; the Ministry of Environment; the Public Service Regulatory Commission (PSRC); and the Committee on Nuclear Safety Regulation (ANRA).

What percentage of Armenia's electricity is generated by hydroelectric plants?

Hydroelectric plants generally provide an additional 20 percentof Armenia's electricity demand,but the levels of generation depend on seasonality and rainfall patterns. Thermal power provides the bulk of the remaining generation. From 2006 to 2022,Electric Networks of Armenia (ENA) has been the sole electric power distributor in the country.

Will US-licensed small modular reactor technology replace Armenian nuclear power plant?

The government has expressed an interest in utilizing U.S.-licensed advanced small modular reactor technology to eventually replace the Armenian Nuclear Power Plant, which would give U.S. firms an opportunity to achieve a significant commercial win and play a transformative role in Armenia's energy security posture.
