

What is EthosEnergy?

EthosEnergy makes energy affordable, available and sustainable by supporting you through the complexity of business today and future transition.

Where does Costa Rica's energy come from?

Most of Costa Rica's energy comes from renewable sources. More than 99 percent of the energy in Costa Rica was generated from renewable sources in 2019. According to the country's National Center for Energy Control, Costa Rica has been running on more than 98 percent renewable energy since 2014.

What is geothermal power in Costa Rica?

Geothermal power is a natural energy source that provides subterranean heat and power as a byproduct of volcanic energy. Costa Rica has six currently active volcanoes and dozens of inactive volcanoes. Unlike many other forms of renewable energy, geothermal can be continuously generated and is not dependent on weather.

Are there private energy companies in Costa Rica?

Though there are a few large private energy companies in Costa Rica, most primarily generate power to sell to ICE. Consorcio Nacional de Empresas de Electrificación de Costa Rica (Conelectricas), formed in 1989, is a union that aims to develop hydroelectric projects.

How much energy does Costa Rica use?

Renewable energy in Costa Rica supplied about 98.1% of the electrical energy output for the entire nation and imported 807000 MWh of electricity (covering 8% of its annual consumption needs) in 2016. Fossil fuel energy consumption (% of total energy) in Costa Rica was 49.48 as of 2014, with demand for oil increasing in recent years.

What ecological services can be provided in Costa Rica?

The ecological services that can be provided include clean water, irrigation, energy production, biodiversity and scenic beauty. This allows for landowners, especially farmers, to earn an extra income even during unprofitable seasons. Costa Rica is producing so much energy that it can be sold.

Our facilities are unique centers of excellence with technologies and expertise that cover all equipment types. We possess full in-house capability to overhaul complete sub-15MW gas turbines at our world class facilities in UK and USA.
