

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photovoltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

How will aspire solar projects benefit Maldives?

In general, the projects will benefit the people of Maldives and the government by lowering electricity prices and providing quasi-budgetary support. 2014 - The first 1.5 megawatt (MW) solar project under ASPIRE had four investors' bids, resulting in a high PPA of 21 US cents per unit of electricity.

What is SolarSea?

SolarSea is the first and the only time-tested commercial solar PV solution for the sea. Swimsol has worked on the world's first floating solar solution for the sea since 2009. All of the components are marine-grade, specifically for tropical sea environment.

What is solar PV on a resort island?

Solar PV on a resort island is a clear sustainability message to your clients and partners. Swimsol provides a unique solution to achieve desired solar production capacity - floating solar powerplant at sea (offshore solar). SolarSea produces 5-10% more energy due to natural cooling at sea.

How will ASPIRE and ARISE help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

How has ASPIRE impacted the Maldives economy in 2022?

2022 - ASPIRE has resulted in the mobilization of about \$28.3 million for 17.5 MW PV installations. Maldives' dependence on tourism and fossil fuel imports makes its economy particularly vulnerable to external shocks. In 2020, when COVID-19 hit, real Gross Domestic Product (GDP) contracted by at least 34 percent.
