Can a fridge battery be recharged using grid power?

Many appliance backup batteries and UPS systems can only be recharged using grid power. That means once the battery runs out, you'll have to wait for the power to come back on after a blackout to run your fridge. EcoFlow's portable power stations give you multiple options to recharge in addition to utility grid electricity.

What size battery backup does a refrigerator need?

The size of the battery refrigerator will depend on the type, power consumption, and size of the refrigerator. For example, if you have a larger fridge that consumes more power, you'll need a large-capacity solar generator to keep it powered. Here is how to calculate what size battery backup for refrigerator you need:

How long can a battery backup run a fridge?

There's no one-size-fits-all answer to how long a battery backup can run your fridge. It depends on the appliance's starting and running wattage requirements, your household's usage patterns, and the battery's storage capacity in watt-hours/kilowatt-hours (kWh).
