

Will Kbsp become Bahrain's first fully energy-sufficient seaport?

APM Terminals Bahrain, operator of Bahrain's main container gateway, Khalifa Bin Salman Port (KBSP), has officially announced the launch of a solar power project worth around \$10m, to make the port energy self-sufficient by the end of 2023, and effectively turning the facility the region's first fully energy-sufficient seaport.

Which Bahrain gas plant has a capacity of 350m ft per day?

In terms of gas processing, Banagas and Tawseah operate facilities that underwent an expansion in 2019. The jointly operated Bahrain Gas Plant boasts a nameplate capacity of 350m standard cu feet per day.

How does Bahrain LNG work?

Additionally, Bahrain LNG oversees a terminal that has a capacity of 800m standard cu feet per day, which includes a 173,000-cu-metre floating storage unit, a nitrogen production facility with an output of 1100 tonnes per day and on-jetty re-gasification capabilities. BGB operates a facility with a capacity of 850,000 tonnes per year.

Why is Bahrain reorganizing its oil & gas company?

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.
