

Why is Bahrain reorganizing its oil & gas company?

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Why is Bahrain investing in renewables?

Bahrain is also beginning to ramp up investment in renewables as it works towards its goal of reaching net-zero carbon emissions by 2060. The spike in oil prices in early 2022 could offer further incentive for Bahrain to expand its green energy capabilities. In September 2021 Bahrain announced plans to restructure its oil and gas industry.

When will Bahrain's energy strategy be decided?

ABU DHABI, Nov 1 (Reuters) - Bahrain's energy strategy and its state oil holding firm's operation plan are likely to be decided in six months with implementation to begin a year later, the firm's CEO Mark Thomas said on Tuesday. The company last month hired Boston Consulting Group to help develop the two strategies and Lazard as financial adviser.

Does Bahrain's Sitra refinery need specialised refining capabilities?

Shale deposits typically yield heavy oil, which requires specialised refining capabilities not currently available at Bahrain's Sitra refinery. The refinery is undergoing a substantial upgrade, expected to be finalised by 2024, to expand its capacity and enhance its ability to process heavier grades of oil.

Will Bahrain invest in alternative energy sources?

Investment in alternative energy sources is also set to expand. Bahrain is monitoring advancements by market pioneers in the hydrogen industry, taking a prudent approach before making significant commitments in this potentially transformative segment.

How can MENA countries take the lead in energy storage?

With abundant land and low-cost solar and wind generation capacities, MENA countries have real competitive advantages that enable it to take the lead in energy storage and successfully navigate the energy transition."
