Customers who sell power to BL&P's grid are billed either under the Feed-In Tariff (FIT) programme or the

pre-existing Renewable Energy Rider (RER). The rates paid to customers for power from renewable energy (RE) sources are determined by the Fair Trading Commission (FTC), while customers continue to purchase power from BL& P at existing electricity rates.

Renewable energy is an obvious choice for Barbados. We are a future-focused nation, committed to playing our part in the global effort to combat climate change. Our future is green and bright. In Barbados we have an ambitious target to become 100 per cent carbon neutral by 2030. This is an attractive space for investment.

Barbados National Energy Policy [6] Implementation Plan for the Barbados National Energy Policy [37] The Policy provides a framework for moving from a fossil fuel-based economy to one completely based on renewable energy sources by 2030.

The Energy Supply Bill is expected to play a crucial role in helping Barbados achieve its ambitious target of 100 per cent renewable energy by 2030 while reducing energy costs. Key provisions include the creation of microgrids for more decentralised energy systems, measures to enable more domestic investors and businesses to participate in the energy ...
