

Why is Bayer focusing on energy storage?

"We admire Bayer's commitment to find projects near its Idaho facility, which has the highest electricity use within Bayer in the United States, signifying a major milestone in their global energy goals." Energy storage is a vital technological component in the successful transition to clean energy.

How can Bayer achieve its sustainability targets?

A key strategy to achieving Bayer's reduction targets, which have been approved by the Science Based Targets initiative, is to purchase 100% sustainable renewable electricity by 2030. Bayer has put a large focus on leveraging energy efficiency and clean energy resources to achieve its robust, science-based sustainability targets.

Is Bayer a sustainable company?

"As an innovation driven company, Bayer recognizes the need to introduce renewable energy solutions that are healthier for the planet and healthier for humans," said Bayer EVP of Public Affairs, Science, Sustainability and HSE Matthias Berninger.

Why are Bayer solar installations so important?

"These solar installations are a strong signal to our employees, customers and communities where we live and operate of our commitment to GHG emission reduction," says Delf Bintakies, Global Head of Sustainability, Safety, Health & Environments (SSHE) at Bayer. "Bayer sets specific criteria for its own procurement of green energy.

Does Bayer have a green energy policy?

"Bayer sets specific criteria for its own procurement of green energy. This includes the proximity of energy production facilities to Bayer sites, the use of new sources of generation and a focus on wind and solar power."

What is CCEW doing with Bayer?

The CCEW Team delivered this landmark arrangement with Bayer and continues to advance the most innovative Pumped Storage Hydropower and Large Volume, Long Duration energy storage project in the West, which will produce firm, yet flexible, clean energy while adding critical new water storage for a rapidly growing Idaho.

The CCEW Team delivered this landmark arrangement with Bayer and continues to advance the most innovative Pumped Storage Hydropower and Large Volume, Long Duration energy storage project in the ...

Bayer 04 Leverkusen is aware of its position as a social role model and of the increasing demands in the use of energy resources - independent of the additional demands in this area ...

Enel North America completed a 2.7-MW solar and 1-MW/2-MWh energy storage system at Bayer's vegetable research and development site in Woodland, California. Located in a region historically prone to rolling ...

What does energy independence mean. Energy independence is an important concept in today's world. It refers to the ability of a country, region, or individual to produce and access its own energy without relying on other ...

The ground-mount system is expected to provide 70% of the site's electrical energy demand, and avoid approximately 44,732 metric tons of carbon dioxide over the project's lifetime. In addition, the battery bank will ...

WOODLAND, CA - January 23, 2024 - Clean energy leader Enel North America and Bayer today announced the completion of a 2.7 MW solar and 1 MW / 2 MWh energy storage system at ...

With the maturity of independent energy storage technology, the traditional evaluation method of independent energy storage effect has strong subjectivity and insufficient objectivity, which ...

Enel North America and Bayer have completed a new energy storage system at Bayer's vegetable research and development site in Woodland, CA that will directly power 70% of the site's energy needs.

Under the deal, CCE will construct multiple variable renewable energy resources plus energy storage facilities in Idaho, generating a total of 1.4 terawatt hours (tWh) of clean ...

Highlights Smart use of energy storage will support four pillars of the Post Carbon Society. RES in combination with energy storage may reduce CO 2 emissions in Croatia by ...

In the past few decades, electricity production depended on fossil fuels due to their reliability and efficiency [1].Fossil fuels have many effects on the environment and directly ...

Construction at one of Broad Reach Power's first tranche of Texas BESS, quickly followed by much bigger projects. Image: Broad Reach Power. China's Contemporary Amperex Technology Limited (CATL) has sold ...
