

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

Will Benin provide 100% electricity to its community by 2050?

Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3. This shows that the government must make more effort to provide 100% electricity access to its community by 2050. Electricity mix of Benin from 2016 to 2020.

How can bioenergy contribute to the energy sector in Benin?

In addition, the Vossa hydroelectric power plant of 60.2 MW is to be built with an annual production capacity of 188.2 GWh. An additional hydroelectric plant is planned to be installed in Bétérou to increase the national electricity production in Benin. Bioenergy can also play a crucial role in the energy sector in Benin.

Does Benin have a green energy potential?

Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years. The country has a huge undeveloped renewable-energy (RE) potential that can contribute considerably to its national energy production capacity. This paper summarizes the current RE situation in Benin and examines its future prospects.

Is Benin a good country for energy?

With a total surface area of 114 763 km², the country is endowed with a high potential for energy resources. However, almost 59% of Benin's population currently lacks access to electricity and the country is heavily dependent on external energy importation.

The earliest sunrise of the summer in Benin City is 6:21 AM on June 1 and the latest sunrise is 11 minutes later at 6:32 AM on August 9. The latest sunset is 6:57 PM on July 16 and the earliest sunset is 12 minutes earlier at 6:44 PM on August 31. Daylight saving time is not observed in Benin City during 2024. For reference, on June 20, the longest day of the year, the Sun rises ...

In partnership with AdMec, a company specializing in solar energy, these youths acquire skills in assembling,

maintaining, and repairing LED and solar streetlights. This project aims to train and integrate 1,000 young people into the renewable energy sector by 2025, as part of the Azali initiative -- the pathway to employment in Fon, one of ...

Benin has started construction of the 25 MW Forsun PV plant, which is set to join the Defisol and TTC projects to expand the Illoulofin Solar Power Station's total capacity to ...

Image: Présidence du BéninThe government of Benin has announced the commencement of construction on the Forsun PV power plant, a 25 MW solar project that will increase the total capacity of the Illoulofin Solar Power Station from 50 MW to 75 MW. The expansion involves three solar arrays and represents a significant step in the country's ...

Specifically, the EU funding intends to increase private sector investment in off-grid solar energy, to strengthen quality assurance through certification of solar products, and to improve the management of electronic waste from solar equipment. ... EnDev is part of the Benin cooking energy programme ProCEAO. Further information. For more ...
