DC-DC switching regulators of Bel Power Solutions are cassette style or chassis mount converters with non-isolated and regulated outputs well-suited for applications from rail communications and industrial where tough reliable power is paramount.

Bel Power Solutions TET4800-48-069RA is a 4800 Watt AC/DC power factor- corrected (PFC) and DC-DC power supply that converts standard AC mains power or high voltage DC bus voltages into a main output of 48 VDC (42-58 VDC) for supplying 48 VDC power distribution in high performance and reliability data center equipment, servers, routers, and network switches.

AC-DC power supplies of Bel Power Solutions are highly efficient high density and highly reliable converters which converts AC input to DC output and are designed for the Server Storage Networking Industrial and Telecommunications industries.

of Bel Power Solutions are DC-DC converters available in all standard brick footprints from 1/16 to 1/2. These products provides high efficiencies and power densities, ultra-low profiles, wide input voltage ranges, high input-transient withstand capabilities and start-up into pre-biased loads. Bel Power Solutions is an active member of the DOSA ...

The Bel Power Solutions FXP/FXC 6000/7000 Series of power supplies offers up to 7000 W of power at 48 V and is a powerful resource for any company seeking higher power levels to automatic test equipment, telecom, data communications and other distributed power designs. This product has a three-phase, three-wire input with selectable low and ...
