

When did Belgium start using nuclear power?

The country's first commercial nuclear power plant began operating in 1974. Belgium decided to phase out nuclear power generation completely by 2025. In March 2022, due to the Russian invasion on Ukraine, Belgium decided to postpone closing of two reactors by 10 additional years. Belgium has a long industrial history in the nuclear sector.

What is Belgium doing with BR3 & EUROCHEMIC?

Decommissioning BR3 and Eurochemic has given Belgium significant expertise in the decommissioning of nuclear sites. Currently Belgium is preparing to contribute to Generation IV reactor research through the MYRRHA project. There are two commercial nuclear power plants operational with seven reactors: Tihange Nuclear Power Station on the Meuse.

Why did Belgium shut down the Doel 4 & Tihange 3 reactors?

In February 2022, due to the Russian invasion on Ukraine, a nuclear phaseout with new gas power plants was untenable and Minister Van der Straeten was forced to switch to the fallback plan. In March 2022, Belgium officially decided to postpone closing the two reactors Doel 4 and Tihange 3 by 10 additional years.
