

What is the Virgin Islands Energy Office?

The Virgin Islands Energy Office (VIEO) is focused on promoting sustainable energy policies in the Virgin Islands through clean energy production and distribution, energy efficiency, transportation, and energy consumption. It achieves this through outreach, financial incentives, training, and technical assistance.

Will the Virgin Islands reduce fossil fuel use by 60% by 2025?

The Virgin Islands, with support from the U.S. Department of Energy (DOE) and the Office of Energy Efficiency and Renewable Energy (EERE), have set a goal of reducing fossil fuel use by 60% by 2025.

How many solar energy systems are installed in the Virgin Islands?

Nearly 1,500 solar energy systems have been installed throughout the territory. 15 MW of distributed solar PV are either in place or under construction. As a result, the Virgin Islands government has authorized \$35 million in funding to install lighting and water retrofits in 34 more schools.

Is the US Virgin Islands a good place to start a wind farm?

The US Virgin Islands have been recognized as a regional leader in clean energy due to the success of collecting wind resource data for its first commercial wind farm. DOE's National Renewable Energy Laboratory has collected the necessary data for this project.

Why should you visit the US Virgin Islands?

The US Virgin Islands are an attractive destination due to their abundance of sunshine and ocean breezes, making them an ideal spot for a tropical getaway. These characteristics also make the territory a natural fit for emerging renewable energy technologies such as solar, wind, and water power.

The U.S. Virgin Islands is taking significant strides toward a sustainable and resilient energy future, primarily through the implementation of ambitious renewable energy projects. These initiatives are set to reduce dependence on fossil fuels, lower electricity costs, and enhance energy security for the islands' residents. Solar and Battery Storage Initiatives One of ...

N2 - This profile provides a snapshot of the energy landscape of the U.S. Virgin Islands (USVI) - St. Thomas, St. John, and St. Croix. The Virgin Islands archipelago makes up the northern portion of the Lesser Antilles and the western island group of the Leeward Islands, forming the border between the Atlantic Ocean and the Caribbean Sea.

Hours after U.S. Secretary of Energy Jennifer M. Granholm toured the Randolph Harley Power Plant, the island of St. Thomas plunged into another island-wide blackout, starkly underscoring the urgent and critical energy crisis gripping the U.S. Virgin Islands. Hosted by Delegate Stacey Plaskett, Granholm's visit was meant to address the power ...

U.S. VIRGIN ISLANDS -- Governor Albert Bryan Jr. is leading the charge towards a greener and more resilient future with an unprecedented collaboration between global technology leader Honeywell and VIElectron, a CB Loranger Company. This visionary partnership is set to transform the energy landscape of the US Virgin Islands through the deployment of cutting-edge Battery ...

The U.S. Virgin Islands (USVI), part of the Leeward Islands of the Lesser Antilles, became a U.S. territory in 1917 and is located in the Caribbean Sea, about 1,100 miles southeast of Miami, Florida. 1,2 The USVI has no

fossil energy reserves, but does have some renewable resources, particularly solar energy. 3,4,5 The USVI imports petroleum products to ...

"It propels us closer to our goal of achieving 30% renewable energy consumption in the US Virgin Islands, fostering a cleaner and greener energy ecosystem," US Virgin Islands Governor Albert Bryan Jr said. According to the EIA, about 80% of the solar that is installed on the islands is distributed rooftop PV, and only 20% utility-scale.

In a significant step forward for renewable energy in the U.S. Virgin Islands, Honeywell announced its collaboration with VI Electron on Tuesday. This partnership marks the beginning of an ambitious plan to implement the first of several advanced battery energy storage solutions (BESS) in up to six strategically placed solar parks across the territory.

In response to escalating energy challenges, Governor Albert Bryan Jr. of the United States Virgin Islands has issued Executive Order No. 537-2024, declaring a State of Energy Emergency. The proclamation comes amidst mounting concerns over the stability of the territory's power supply, exacerbated by global geopolitical tensions and local financial strains. ...
