1kW - 3kW Off-grid Systems. 1kW - 3kW off-grid systems are not quite enough to power your main home but could be enough for a weekend cabin, outbuilding, home office, holiday home, summer house or workshop.. A 1200W off-grid solar kit would generate enough energy to run a small refrigerator, small appliances, charge a phone and run a couple of light bulbs.

If you are building a new cabin we can design a system from the ground up that is made specifically to run most efficiently off an off-grid solar system. A custom ground up build may sound expensive but by having your cabin run more efficiently it requires a much smaller Solar array and battery bank to power saving you money.

Discover our collection of off-grid solar kits, including complete off-grid solar power systems and kits. Harness sustainable energy with our off-grid solar solutions, ideal for powering remote locations and homes without access to the grid.
