

What is cubic modular system?

The Modular System is an enclosure system for electrical switchboards making it possible to construct any type of low voltage switchboard. Freedom to assemble the kind of electrical switchboard you need. The CUBIC Modular System is constructed on the basis of a main module size of 192 mm, which is dividable with 12 figures without decimals.

Why should you choose cubic modular system?

When a safe and efficient power distribution is needed - the CUBIC Modular System is the answer. The Modular System from CUBIC is one of the most versatile and safe enclosure solutions in the market. The Modular System is an enclosure system for electrical switchboards making it possible to construct any type of low voltage switchboard.

How big is a cubic module?

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 figures without decimals. During the construction of a panel, logical main and sub modules are used so that the fitter need not take millimetres into consideration. All fitting is done by means of only very few tools.

How is the cubic modular system verified?

by carrying out the routine verification. The CUBIC Modular System is designed and verified in accordance with the international IEC 61439 standard. National modification

Where can a modular system be used?

The modular system can be used in many situations, where electrical switchboards are a necessity to secure the operation of electrical equipment. The photo below shows a FORM 2 protection of the busbars vertically, in top and in front of the joints of the busbar systems.

Who are cubic switchboard manufacturers?

Western Controls Pty Ltd have been an Accredited CUBIC Switchboard Manufacturer since 2004. CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels.

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

The modular design lends itself to a rapid manufacturing process which, in turn, can help us achieve the most challenging of customer delivery schedules. We would typically offer this system type tested and utilizing devices from Schneider Electric, Eaton or ABB. Technical Information: Busbar system to 6300A, Type tested

IEC/EN 61439-1 & 2 : 2011

Electrical components One of our key focuses is adding value to our Partners" businesses. With our range of electrical components, we provide added value through safety, increased competitiveness and easy mounting. As with everything we do, our range of electrical components is thoroughly tested in the Modular System. CUBIC offers five types of electrical components: [...]

The modular design lends itself to a rapid manufacturing process which, in turn, can help us achieve the most challenging of customer delivery schedules. We would typically offer this system type tested and utilizing devices from ...

The CUBIC modular system has been mechanically tested through a number of manoeuvres more than 200 times. This applies for the system generally and for the Multi Drawer system"s mechanical interlocking etc. in particular. The constructions have further been verified by KEMA. KEMA and SABS Det Norske Veritas to own requirements,

CUBIC ?????????????,???????? ??????: o ???????? o MCC ?? o ??? o 19 ??? CUBIC ???????????????????????  
?? ...

Design systems that best fits your plant - CUBIC Modular System is brand agnostic; No need to over design. Best-fit engineering combined with multiple power input locations; Cut accreditation time - CUBIC Modular System are tested and verified by ...

CUBIC-Modulsystem A/S | 6,800 followers on LinkedIn. The Power of Modular Thinking. | CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type ...

Modular System; CPS25; Electrical components; Cu-flex. Flexible copper busbar; Standard & Customized Solutions; Tests. Tested solutions; UL standard and CUBIC; IEC 61439 standard and CUBIC; ... CUBIC-Modulsystem A/S Skjoldborgsgade 21 DK-9700 Brønderslev Tel: +45 9882 2400 E-mail: info@cubic .

CUBIC Modular. Ganhe flexibilidade, agilidade, expansibilidade e eficiência. Oferece inteligência, conectividade, proteção, desempenho e total tranquilidade! O Sistema de estrutura modular. eBook O Sistema de estrutura modular

The CUBIC Modular System is assembled by Partner System Builders to produce Assemblies that are verifiable in accordance with the latest requirements of the Low Voltage Directive, and the 61439 range of Standards. The close co-operation between CUBIC and our Partners includes a commitment to continued updates and training to ensure the quality ...

With Cubic Modular System EUROSIC can easily configure Power Distribution Boards up to 8750A, Motor Control Centers for motor control up to 630A per unit (Multi-Drawer), Marine panels, various Distribution boards, fixed or draw-out type, Control panels and special applications, depending on the request.

When a safe and efficient power distribution is needed - the CUBIC Modular System is the answer. The Modular System from CUBIC is one of the most versatile and safe enclosure solutions in the market. The Modular System is an enclosure system for electrical switchboards making it possible to construct any type of low voltage switchboard.

When a safe and efficient power distribution is needed - the CUBIC Modular System is the answer. The Modular System from CUBIC is one of the most versatile and safe enclosure solutions in the market. The Modular System is ...

The NHP CUBIC Modular System is based on the concept of efficiently using standard parts to construct a tailored switchboard to achieve your individual project requirements. The system is independently tested for verification to IEC 61439, making all documentation directly applicable to AS/NZS 61439 "Original Manufacturer" verification ...

Chaque fois que le besoin d'une distribution électrique sûre et efficace se fait sentir, le système Cubic Modular est la réponse. La pensée modulaire qui sous-tend notre système d'armoire caractéristique permet de construire tout type de solution de tableau de distribution dans le segment de la faible puissance, sur la base de plusieurs ...
