What is biomass energy?

Biomass energy, or "bioenergy," is the energy from plants and plant-derived materials. Biomass has been in use since people first began burning wood to cook food and keep warm. Wood is still the largest biomass energy resource today.

Bioenergy is a type of renewable energy that is derived from plants and animal waste. [1] The biomass that is used as input materials consists of recently living (but now dead) organisms, mainly plants. [2] Thus, fossil fuels are not ...
