Bolivia is the largest producer and exporter of natural gas in South America. The 2016-2020 National Economic and Social Development Plan aimed to develop natural gas activity through exploration, industrialization, and an increase in power generation. However, since 2014 Bolivian gas production has been declining due to mature fields and lack of recent discoveries.

More recently, Bolivia's national electricity company (ENDE) projected that by 2025, 74% of the installed capacity will be from hydropower, 4% from non-hydro renewables energy, 12% from combined cycle plants, and 10% from thermal power plants (ENDE, 2016). These projections, though, only take into consideration the SIN.
