

Our portfolio covers the required testing of the fundamental functions of an AGV and its control system, irrespective of the technology used. Additionally, our Global Market Access (GMA) experts perform testing and certification services based on applicable standards and regulations in the European, Asian and North American markets.

Validated safety for your AGV. AGVs (also called automatic guided vehicles) and automated guided vehicle systems (AGVS) have become indispensable for the automated operations within manufacturing, logistics and hospitals. To ensure reliable performance and safety, TÜV SÜD offers a complete portfolio of AGV testing and certification services.

When it comes to the point to find a reliable, powerful and scalable battery solution for an AGV that makes a fast time-to-market possible, your project can become very challenging. VARTA looks back on 130 years of battery knowledge and works with the best in the field.

All AGV batteries require periodic charging for continued AGV operation. The primary battery charging methods include Swap Out where the discharged battery is exchanged for a fully charged battery, and Opportunity Charging where the ...
