

What is the storage capacity of strategic reserves in Botswana?

Botswana's strategic reserves storage is also not yet up to international standard; storage capacity is approximately 18 days compared to the international standard strategic storage capacity of 90 days. Commercial buffer stock stands at less than five days of national consumption compared to the international standard of 14 days cover.

Can Botswana improve domestic energy security?

A new report published by the International Renewable Energy Agency (Irena) has confirmed that Botswana has considerable opportunity to enhance its domestic energy security and increase access to modern energy services.

How much solar energy does Botswana use?

Botswana has tremendous potential for solar energy utilization, with an annual Direct Normal Irradiation equivalent of 3,000 kWh/m²/a in most parts of the country, with an average insolation on a horizontal surface of 21 MJ/m²/a;

Does Botswana have a sustainable future?

Irena director-general Francesco La Camera adds that Botswana has a significant endowment of renewable energy resources that, if fully developed, could stimulate sustainable, economy-wide gains.

Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.
