

What is Brazil's energy mix?

Brazil's energy mix is diverse; hydropower, fossil fuels, biofuels, wind energy, and solar power all make significant contributions (Table 1). Brazil's total energy production increased by an average annual growth rate of 1.5% from 2011 to 2021.

What percentage of Brazilian electricity is renewable?

The renewable energy sector accounts for 83% of the Brazilian electricity matrix, while the global average is around 25%. The renewable energy industry has continuously expanded over the years through private investment.

How much energy is produced in Brazil in 2021?

Brazil's energy production in 2021 accounted for 2.0% of global production and 48.8% of South America's total. Energy consumption in Brazil increased by an average annual growth rate of 0.5% between 2011 and 2021, compared with 3.3% between 2000 and 2010, driven by Brazil's real GDP per capita growth (Figure 4).

What is Brazil's energy policy?

Brazil's medium-term energy policy is reflected in the Ten-year energy expansion plans (PDEE), which are updated on a yearly basis. Originally focused on electricity, in 2007 the ten-year plans expanded to cover the energy sector. The National Energy Plan 2030 (PNE), developed in 2006-07, provides a longer-term integrated energy strategy.

Why is Brazil a good place to invest in fossil fuels?

Brazil has all the elements for becoming an engine of the rapidly evolving global energy transformation. The country boasts some of the world's largest deposits of critical minerals essential to make possible the transition from fossil fuels. Brazil is already an exporter of some of these minerals.

How much money has been invested in solar energy in Brazil?

An additional \$1 billion has been invested in solar distributed generation since 2012. This amount is expected to increase exponentially in the next several years. While Brazil still has vast areas for the development of additional solar and onshore wind projects, several potential offshore wind projects have been announced.

The Río de Energía Verde (Green Energy Rio) programme to supply municipal buildings with clean energy is led by the Secretary of Finance and Planning. At the end of 2022, the ...

Brazil: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key ...

Brazil is a frontrunner in clean energy transitions: among the world's largest economies, it boasts the lowest share of fossil fuels in its energy mix. Holding the G20 Presidency in 2024, Brazil has an opportunity to lead the ...

At Cleanserve Energy, we are committed to providing quality education through our support programmes for children that are less privileged and do not have access to basic primary ...

Secretary of Energy of the United States Jennifer Granholm and the Federative Republic of Brazil's Minister of Mines and Energy, Alexandre Silveira announced new, joint initiatives on clean energy and renewed their ...
