If you live in an area that frequently suffers from power cuts, or the power cut commonly lasts for hours at a stretch, then the Artis AR MiniDC UPS Power Backup is the best choice. This Mini UPS is powered by multiple batteries with a total combined power output of 8800 mAh, making it one of the country's most powerful UPS for WiFi routers.

A router typically work on 12V. With a UPS, you start with a 12V battery which UPS boost its voltage to 220v (or 110v) then your router adaptor change it back to 12V to power the router. You lose a lot of power in this conversion alone. Probably more power is lost to this conversion than power consumed by your router.

In turn, the mini UPS, via its own 12v power cord, supplies the power along with a small internal battery as a backup. But they're very low quality, a potential fire hazard, and we simply can't recommend them when there are very high-quality products on the market at similar or slightly higher price points.
