

The 2020 new wind power capacity figures for China, released by the National Energy Administration (NEA), are truly formidable. The NEA announced that a staggering 71.7 GW of new wind capacity was installed last year - more than double China's previous annual growth record and far exceeding GWEC's Q3 2020 expectations.

But over time, they can save you quite a bit on your energy costs. When you have solar panels you're using the energy from the sun to power your home for free and therefore not paying as much for electricity. Indeed, some solar-powered people produce so much energy that they have leftovers. This extra energy can be sold back to the power company.

Nosotros, una filial del grupo Qingdao ALLRUN, somos una de las empresas de alta tecnología especializadas en paneles solares, sistemas de energía solar, sistemas de turbinas eólicas y generadores de imanes permanentes. Integramos fabricación, I+D, instalación, servicio postventa y comercio internacional en uno.
