

Does Sri Lanka use fossil fuels to generate electricity?

Sri Lanka pledged at the 22 nd UNFCCC Conference of Parties in Marrakech, Morocco, as part of the Climate Vulnerable Forum, to use only renewable energy for electricity generation by 2050. At that time--in 2016--52% of Sri Lanka's electricity was generated through fossil fuels (ADB, 2019; World Bank, 2019 ).

What can Sri Lanka do with excess wind energy?

Other applications to Sri Lanka are in the early discussion stages which include the ability to work on green hydrogen technology using excess wind to move from an energy deficit to a surplus situation (Fernando et al., 2023). Wind energy has the potential to be harnessed and transformed into hydrogen using an electrolyze.

Which sectors are causing the biggest dent in Sri Lanka's net-zero goal?

The time series analysis complemented this work by identifying how sectors such as transportation and non-renewable electric power generation causing the largest dent in Sri Lanka's effort to achieve the ambitious net-zero goal by 2050.
