

In this blog, Critical Energy examines the potential for large, utility-scale, solar PV farms in Lebanon. This text is a prologue of a holistic assessment of the true potential of solar PV...

Given that Lebanon has started its journey for procuring large scale renewable energy power, specifically from solar photovoltaics and onshore wind, the EU-funded CEDRO project, the GEF funded DREG project, and the ...

As shown in the first picture above, the idea behind the Beirut River Solar Snake is to cover the concrete structure, around 6 meter above river level, with solar panels and to generate, as a start, 1MW which will be linked ...

Lebanon aims to source 30% of its electricity and heat from renewable sources by 2030, and the recent signing of the 11 solar PPAs marks the country's initial foray into utility-scale solar...

5 ???&#0183; United Nations Office at Nairobi (UNON) on behalf of the United Nations Human Settlements Programme (UN-Habitat) Lebanon, seeks the interest of qualified vendors and ...

These contracts are part of the plan to reform Lebanon's electricity sector, put forth by Fayad in February 2022. It includes the medium-term construction of 12 solar farms with a capacity of...

In this blog, Critical Energy examines the potential for large, utility-scale, solar PV farms in Lebanon. This text is a prologue of a holistic assessment of the true potential of ...

If you're new to solar farms, you might wonder what they're made up of. Solar farms usually consist of ground-mounted solar panels spread across a large acreage. Generally, you'll need at least 25 acres of land for every 5 ...

In May 2023, the Energy Ministry established agreements with several private companies to construct 11 private solar farms that will sell electricity directly to EDL. But the private ...
