Whether you require storage for a single drum or multiple tanks, we have a Bunded Storage unit that will suit your needs. Our units are designed to comply with environmental regulations, ensuring that your hazardous materials are stored safely and securely.

Cabins & Containers offers a number of different bunded storage facilities, ideal for the storage of chemicals at an industrial scale. Bunded storage containers can hold a number of standard drums. Using a bunded storage vessel as a drum store will ensure that if the tank or drum fails, the spillage will be contained within the container.

Features of bunded chemical storage containers include: Constructed from materials that resist corrosion and chemical reactions. Designed to hold a specific volume of chemicals, with the bunded area capable of containing spills up to 110% of the container's capacity.

Bunded storage is the safest way to store any hazardous substances such as oil, diesel fuel, strong chemicals and other potentially volatile liquids. They are used primarily in outdoor industrial settings, where large bunded fuel tanks will typically store the barrels, IBC containers or other types of oil storage containers - for safe access and storage while onsite.
