

Why is Bahrain reorganizing its oil & gas company?

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Why is Bahrain investing in renewables?

Bahrain is also beginning to ramp up investment in renewables as it works towards its goal of reaching net-zero carbon emissions by 2060. The spike in oil prices in early 2022 could offer further incentive for Bahrain to expand its green energy capabilities. In September 2021 Bahrain announced plans to restructure its oil and gas industry.

Can floating solar power be used in Bahrain's territorial waters?

To address the problem of land scarcity for larger solar farms, SEA is considering installing "floating solar" technologies to be deployed for power generation in Bahrain's territorial waters. Offshore renewable energy development presents an opportunity to pursue large-scale generation and achieve higher renewable energy targets.

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage(batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

Why is offshore wind a promising sector in Bahrain?

Offshore wind is also a promising sector due to of Bahrain's favourable wind conditions and its shallow waters, which are conducive to the installation of wind farms.

Does BGB supply jet fuel to Bahrain International Airport?

BGB operates a facility with a capacity of 850,000 tonnes per year. Moreover, BAC supplies jet fuel to Bahrain International Airport from its aviation fuel farm, which has a capacity of 30,000 cu metres. This facility, which was completed in April 2021, enhances the airport's fuel supply capabilities.
