

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Do Timor-Leste businesses experience electricity outages?

Research shows that nearly all businesses in Timor-Leste experience electricity outages, in some cases multiple times a week. Outages affect businesses in different ways: For tourism businesses, it impacts customer experience (internet, device charging, air conditioning and fans, food quality, and inability to refuel diving tanks).

Can a solar energy system help Timor-Leste achieve the 2030 Agenda?

"In Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home. Our solar energy system can be a model for other UN Country Offices to show how we can jointly, sustainably and effectively tackle greenhouse emissions while reducing operational costs, and scale up support across the United Nations System".

Does Timor-Leste have electricity?

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Could Timor-Leste be a cost-efficient alternative energy solution?

The Operations Management Team started weighing the feasibility and working on a cost-efficient alternative energy solution in 2016-2017 when Timor-Leste was facing high electricity costs and increased CO₂ emissions. "In Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home.

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is ...
