

How much energy will release supply in Cameroon?

When the extensions of the projects are completed, Release's projects in totality will supply energy to about 200,000 households in Cameroon, according to ENEO estimates, generating an annual production of about 141.5 GWh of electricity.

Will US companies help Cameroon meet its energy needs?

The study will also include the design and monitoring of a minigrid pilot project. U.S. Chargé d'Affaires in Cameroon, Vernelle Trim FitzPatrick, said: "We are proud that American companies will be part of developing new solutions to meet Cameroon's energy needs.

Does Cameroon have a stable electricity supply?

There have been reports of significant improvements of electricity supply in the northern parts of Cameroon. Regions that fall under the Northern Interconnected Network were prone to experiencing power outages. Today we are proud to say that they have more stable power in the country courtesy to our rapidly deployable leasing solution.
