

Which portable power station is best for camping?

Based on our hands-on experience and in-lab testing, the Jackery Explorer 2000 Plus is the best portable power station for camping. Its modularity makes it a versatile option for all types of camping. Which portable power station for camping is right for you?

Are lithium ion batteries safe for camping?

Battery Chemistry: Lithium-ion (Li-ion) is the traditional battery technology, but the newer lithium iron phosphate batteries (LiFePO₄) are safer and have a much longer lifespan. How did we test these portable power stations for camping?

Should you buy a camping power station?

As a general rule, you should buy the highest-capacity power station that you can afford. The more capacity you have, the more use you will get out of the power station. And the more likely you will be able to use it for things other than camping, such as during power outages. But camping power stations are still really expensive.

Should you buy a LiFePO₄ battery for a portable power station?

The good news for anyone in the market for a portable power station is that the industry as a whole is moving toward LiFePO₄ batteries. One of the most important factors in choosing a portable power station is the amount of energy it can store, known as its energy potential.

Are Li-Ion power stations a good choice for camping?

Lighter: They are significantly lighter for the same amount of capacity, which is useful if you need to carry the power station around camp. Cheaper: The immediate cost of Li-ion power stations is cheaper. Though note that they don't last as long, so end up being more expensive in the long run.

6. Comparing Price of Camping Power Stations

Is Westinghouse a good power station for camping?

If you want a cheap power station for camping, then Westinghouse is a good choice. They have several lower-capacity power stations which still have AC outlets. Because Westinghouse power stations use Li-ion batteries, they are lightweight and affordable.
