Does DOE have a carbon storage program?

Washington, DC: CRS; 2018. Damiani D. Safe geologic storage of captured carbon dioxide: two decades of DOE's carbon storage R&D program in review. Report. Washington, DC: US DOE Office of Fossil Energy; 2020. Research report on impacts of Hokkaido Eastern Iburi Earthquake on CO₂ reservoir. Report. Tokyo: Japan CCS Co., Ltd.; 2018 Nov.

Who administers the carbon storage program?

The Carbon Storage Program is administered by the FE Office of Clean Coal and Carbon Management.

What is geological CO₂ storage?

Geological CO₂ storage is the ultimate goal of CCS projects and the driving force of CO₂ capture. Further improving the accuracy of technologies for the measurement, monitoring, and verification (MMV) of CO₂ storage capacity, emission reduction, and safety remains a problem for geological storage.

Does energy storage allow for deep decarbonization of electricity production?

Our study extends the existing literature by evaluating the role of energy storage in allowing for deep decarbonization of electricity production through the use of weather-dependent renewable resources (i.e., wind and solar).

Does energy storage reduce CO₂?

Some energy storage technologies, on the other hand, allow 90% CO₂ reductions from the same renewable penetrations with as little as 9% renewable curtailment. In Texas, the same renewable-deployment level leads to 54% emissions reductions with close to 3% renewable curtailment.
