

Does Caterpillar offer energy as a service?

For North American applications, Caterpillar offers Energy as a Service (EaaS) using technologies that automatically dispatch customers' on-site assets to generate and store energy at the optimum times for maximum cost savings.

Are Caterpillar products sustainable?

100% of new Caterpillar products through 2030 will be more sustainable than the previous generation through collaborating with customers, reduced waste, improved design for rebuild/remanufacturing, lower emissions or improved efficiency.¹ 100% of new products introduced in 2023 were more sustainable than previous generations.

How many connected assets does Caterpillar have?

Caterpillar has more than 1.5 million connected assets. Robust connectivity enables our customers to work smarter and more efficiently by using machine and engine data. Our team has evolved how we extract data from equipment.

Does Caterpillar have a battery electric underground loader?

Caterpillar has also developed a battery electric underground loader, the R1700 XE. Along with its mobile equipment charger, the MEC500, this solution is a game changer in deep, difficult to ventilate and high temperature underground mines.

Does Caterpillar use electric drive?

While Caterpillar has been incorporating electric drive technology into its construction and mining machines for many years, today's advanced electric drive machines offer greater agility, improved cycle times, less fuel consumption and lower carbon emissions than earlier versions.

Does Caterpillar have a battery electric truck?

Caterpillar has also successfully demonstrated our first battery electric prototype underground mining truck. This battery electric truck will complete Caterpillar's first fully electric underground load and haul solution when paired with the commercially available R1700 XE Battery Electric Loader.

Caterpillar Inc. today announced the launch of Cat® Energy Storage Systems (ESS), a new suite of commercially available battery technologies that help enhance power reliability and quality, improve flexibility in power system ...

The Cat Energy Storage System, or ESS, is a rapidly deployable electric power solution to help customers integrate multiple power sources on a worksite. The ESS can provide grid ...

Rent a 30kW or 60kW energy storage system from Milton CAT. The energy storage system integrates with diesel generators to optimize your power generation efficiency. Constantly monitoring load levels, the onboard energy ...

For Worldwide Release: October 2023. IRVING, TEXAS - Caterpillar Inc. today announced the launch of Cat® Energy Storage Systems (ESS), a new suite of commercially available battery ...

Construction and industrial equipment manufacturer Caterpillar has launched an integrated energy storage system (ESS) solution, the Cat ESS suite of battery storage products. The suite includes scalable and modular ...

Who we are Caterpillar Energy Solutions. With its two brands, MWM and Cat ®, Caterpillar Energy Solutions stands for highly-efficient and eco-friendly solutions for distributed power generation, and manufactures gas ...

A Caterpillar Microgrid Controller was used to operate two Cat® Power Grid Stabilization (PGS) 1260 battery energy storage systems along with the 1.5 MW hydrogen fuel cell. Caterpillar led ...

The Cat Energy Storage System (ESS) can help to meet a wide range of our customers' energy storage and charging needs, including power source integration at a worksite, grid stabilization, transient assist and renewable ...

Cat® battery energy storage systems (BESS) use chemical energy to store electricity from renewable and low-cost sources for dispatch as needed. This time shift of energy saves ...
