

Cayman Islands pasat roofing and solar energy

How can the Cayman Islands build climate resilience?

With a target of 70 percent renewable energy by 2037, the Cayman Islands is seeking to build climate resilience by purchasing clean energy for its electricity supply. The country established its first utility-scale solar project in 2017 through a power purchase agreement with renewable energy generated from the Bodden Town Solar Farm.

What is the first commercial solar project in Cayman?

The 20 acre 5MW Solar Farm located in Bodden Town is the first commercial solar project in Cayman. Completed in 2017, this solar farm was also the first Independent Power Producer (IPP) in Grand Cayman, selling electricity to CUC through a Power Purchase Agreement (PPA).

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

Why did Bodden Town solar move to the Cayman Islands?

The original developers of the Bodden Town Solar facility sought to exit the Caribbean market once the plant entered service. BMR seized the opportunity to establish operations in the Cayman Islands, expanding the footprint of its business and positioning itself for further growth in this important market.

Not only will a good roof help to keep you dry, but due to Cayman's hot and humid climate, it can also keep your house cool if constructed accordingly. In Cayman, roofing choices are numerous: light-weight metal standing-seam (great for adding solar panels later), aluminium, prefabricated truss frame, solar, snap-lock, shingles and Spanish tiles.

That's our commitment to every solar power project we perform. Affordable Solar Cayman Ltd. offers solar power consulting and systems installations in Cayman Islands. We provide services to commercial and residential projects, including ...

Our roof was badly damaged and Pasat Roofing did an excellent job for replacement. From the onset, they were ontime (in fact, they were early); the estimate was a fair and honest price; the workmanship was exceptional; their workers were very professional; they left the building spotless clean before, during and after the job; and we passed inspection with no issues.
