The Cayman Islands" solar market stance. The Cayman Islands, a British territory situated in the western region of the Caribbean Sea, has a 70% renewable energy target by 2037. Although it is still heavily dependent on fossil fuels for energy generation, it has made considerable efforts to achieve this target.

Environmental Benefits: Solar energy is a clean and renewable source of power that produces no harmful greenhouse gas emissions or contributes to air pollution. Switching over to solar can significantly reduce your carbon footprint and help combat climate change, not only for yourself but for the entire Cayman Islands too.
